

US Navy SMIT Enterprise Contract

Portfolio License Agreement for Broadcom/Symantec Security Products

Unlimited Deployment of Key Security Products

Endpoint Security

Enterprise Security Complete
Data Center Security – Server Advanced
Protection Engine
Industrial Control System Protection
Endpoint Encryption Products
Cloud Workload Protection
IT Management Suite
Ghost Solution Suite

Network Security

Secure Web Gateway Appliances
Web Protection Suite
Web Security Service
Management Center Appliance or Virtual Appliance
Reporter
Content and Malware Analysis
Messaging Gateway Appliance or Virtual Appliance
Web Isolation
Email Security.cloud
Intelligent Services
SSL Visibility Appliance
Web Application Firewall
Secure Access Cloud
Security Analytics

Contract Extension

The US Navy SMIT Enterprise contract covers essential Broadcom Endpoint and Network Security solutions, as detailed above. To explore options to add [information security](#) and [identity security](#), or efficiency solutions including [ValueOps](#), [DevOps](#), [AIOps](#), and [Automation](#), please contact your Broadcom Account Representative.

Portfolio License Agreement for Broadcom/Symantec Security Products

- Unlimited deployment of covered products on premises, hybrid, or in cloud
- Training and User Education includes self-paced eLearning library and instructor-led virtual classroom and lab training
- Add new products or NGEN users at no cost
- Business-critical support, with option for a dedicated support engineer
- Five-year contract (1 Oct. 2021–30 Sept. 2029) plus three option years; monthly payment schedule
- Project Management Interlock provides feedback directly to product managers, access to beta software, and input to roadmaps
- Customer Success Manager offers assistance with registration, adoption, and project management

Scan for electronic access to descriptions, data sheets, and videos of covered products.

Endpoint Security

Enterprise Security Complete	Single agent providing comprehensive, multi-layered detection and prevention across workstations, mobile devices, and Active Directory.	✓	■	≧
Data Center Security - Server Advanced	Battle-tested system hardening technology blocks advanced and zero-day threats across more than 60 current and legacy OS.	✓	■	≧
Protection Engine	Enforcement of network-layer Zero Trust to protect files and URLs regardless of platform.	✓	■	≧
Industrial Control System Protection	Self-contained station scans any USB mass storage device, including devices encrypted with Bitlocker, IronKey, Kingston, and others.	✓	■	≧
Endpoint Encryption Products	Full-disk data encryption for Windows, Mac, and UNIX OS, to secure data at rest, in motion and in use across multiple use cases.	●	■	≧
Cloud Workload Protection	Protection against advanced threats and zero-day attacks for critical workloads across multi-cloud and on premises environments.	●	■	≧
IT Management Suite	Visibility needed to secure, deploy, patch, and remediate local or remote endpoints across commonly used operating systems and applications.	●	■	≧
Ghost Solution Suite	Industry leading solution for deploying and managing desktops, laptops, tablets, and servers.	●	■	≧

Network Security

Secure Web Gateway Appliances	Zero-trust security stops network traffic for assembly, inspection, and authentication and “deny by default” filtering of web and URL content.	✓	■	≧
Web Protection Suite	On-premises Secure Web Gateway with cloud-delivered SWG as a service in a simplified per-user licensing model.	✓	■	≧
Web Security Service	Network security-as-a-service, applying policies consistently across cloud and on-premises gateways.	✓	■	≧
Management Center Appliance or Virtual Appliance	Centralized visibility and control for the entire Symantec network security product portfolio.	✓	■	
Reporter	Log collection and storage for Symantec ProxySG, ASG, WSS, Content Analysis, Reverse Proxy and Web Application Firewall solutions.	✓	■	
Content and Malware Analysis	Multi-layer threat protection at the Gateway, blocks, inspects, and detonates malicious payloads.	✓	■	≧
Messaging Gateway Appliance or Virtual Appliance	The most advanced email security defense in the industry, with on-premises, hybrid, and cloud deployment models.	✓	■	≧
Web Isolation	Executes web sessions safely away from the endpoints; can complement CBII by securing any areas of mission-critical traffic that need isolation.	●	■	≧
Email Security.cloud	Safeguards cloud and on-premises email against spear phishing, ransomware, and Business Email Compromise.	●	■	≧
Intelligent Services	Real-time web content protection, security categorization, and application control, for customized, policy-based risk management.	●	■	≧
SSL Visibility Appliance	Visibility and control over encrypted traffic, to ensure compliance with privacy, regulatory and acceptable-use policies.	●	■	
Web Application Firewall	Monitoring, filtering, and blocking malicious of traffic while preventing data loss and exfiltration.	●	■	≧
Secure Access Cloud	Creates a software-defined perimeter between users and agency applications to secure any device or location.	●	■	≧
Security Analytics	Full-pack capture for inspection, visibility, faster forensics, and anomaly detection on all on-premises or cloud traffic.	●	■	≧
