

Automation Newsletter - October 2023

The latest product news, links to webinars, and roadmap replays, as well as authoritative articles by our automation experts.

Now Available On-Demand

If you missed our live event or want to remind yourself of some sessions, the **2023 Automation Virtual Summit** is now available on-demand.

Some of the session highlights:

- Dan Twing, COO, EMA Research, discussed industry trends impacting automation.
- David Gehringer, Principal, Dimensional Research, walked through fascinating research that showed the impact of the cloud on automation and what your peers are doing about it today.
- Broadcom experts advised how to solve some of the most significant issues affecting IT Operations.
- Rajeev Kumar provided a view into the future of automation and what you can expect to impact your work life over the coming years.

Remember to visit the product showcase and download the latest research reports, demonstrations and how-to guides.

A New Era for Automation

Most enterprises – 92% – report having a multi-cloud strategy; 76% use multiple public cloud providers. These multi-cloud environments have evolved mainly from decentralized decisions rather than deliberate strategy, leaving many organizations struggling with increased complexities, costs, and skills.

In this Forbes article, Serge Lucio, VP and GM of Broadcom's Agile Operations Division, shares how automating multi-cloud environments is critical to overcoming these challenges and key to reshaping IT strategies.

AutoSys Sees Continued Innovation, Expanded Multi-Cloud Support

Mark Twain is often **quoted as saying** that the reports of his death were greatly exaggerated. The same could be said about AutoSys.

Aline Gerew, Head of Automation for the Agile Operations Division at Broadcom, highlighted the exciting developments and ongoing investment in AutoSys in a recent blog post. Take a few minutes to learn how fast this technology continues to evolve.

Change Modeling: 5 Must-Have Capabilities for Your Workload Automation Solution

Solving problems is great. If it's a high-profile issue, dropping everything, responding quickly, applying fast thinking and expertise, and resolving the problem can be rewarding and even feel heroic. However, what's even better is preventing issues from occurring in the first place.

Read the blog from Jon Hiett, Automation Specialist, Broadcom, on the five capabilities essential to protect your workload automation. You can take the conversation further with the link to the eBook in the blog.

New Product Roadmap Sessions

In October 2023, Product Management for AutoSys and Automatic Automation published their latest roadmap sessions.

Things are moving fast in automation, so this is the perfect time to catch up with all the significant innovations and advancements across these great products.

Product roadmaps for Dollar Universe, dSeries and AppWorx are scheduled for November, so look out for invitations through the community or the next newsletter.

Watch the October 2023 roadmap sessions.

Product Lifecycles

Maintaining version currency is really important for Automation. You never want to accidentally run out of support on your product version. Check the lifecycle of your version's product lifecycle on the [support platform](#). Get ahead of the curve for your next upgrade.

Product Notifications

Keep informed and register your interest on the [Product Notifications system](#). Receive proactive notifications of the availability of new releases, patches, and critical information on products. We recommend at least one person in your organization be registered.

Stay In Touch

We hope this newsletter is helpful to you. Thank you for forwarding it to colleagues or contacts interested in automation news.
