The latest product news, links to webinars, and roadmap replays, as well as authoritative articles by our automation experts.

### Automic Automation V24 Released

We are thrilled to announce the release of Automic Automation V24. In today's interconnected world where diverse workforces and global operations are the norm, Automic Automation V24 is set to transform how businesses operate on a global scale.

The major themes of this release include:

- Global Collaboration through Unicode/UTF-8 Support
- Enhanced Accessibility for All Users
- Empower Development with the Automic REST API
- Unified OS Agents for a Consistent Experience

This release underscores Broadcom's commitment to providing a robust and reliable platform that meets the needs of its diverse user base.

Join our webcast, "What's New in Automic Automation V24," hosted by Kaj Wierda, Product Manager for Automic, Broadcom, to learn how Automic Automation V24 is paving the way for a more connected and inclusive global business environment.

### SLA Simulation for AutoSys

Are you tired of facing unexpected, often negative, outcomes when making changes to schedules in AutoSys? It's a frustration shared by many. However, there's good news on the horizon.

Join Automation Specialist Jon Hielt as he unveils a groundbreaking solution that ends this uncertainty. Regardless of dependency modifications, the addition of new jobs, alterations to expected run times, or a blend of these factors, you can now anticipate the impact on your Service Level Agreements (SLAs) before implementing them in AutoSys.

### Announcing AWS Batch Integrations

The AWS Batch Extension simplifies the coordination of AWS Batch workloads within your current enterprise workload automation system.

Serving as a centralized "manager-of-managers," it enables you to schedule AWS Batch workloads effortlessly while tapping into the advanced capabilities of your enterprise solution. This includes managing dependencies, corporate calendar integration, event-based scheduling, and SLA management—simplifying operations and improving service delivery.
