Automation Airflow Connector for AAI with the 6.5.2 Release

In the rapidly evolving world of automation, the latest release of Automation Analytics & Intelligence (AAI) 6.5.2 heralds a significant leap forward, especially with its new Airflow Connector.

This update bridges the gap between on-premises automation systems and cloud-native solutions like Apache Airflow and Google Cloud Composer, offering unprecedented visibility and control across disparate automation environments.

As organizations continue their digital transformation journeys, a cohesive, centralized view of automation becomes paramount. AAI 6.5.2 addresses this need and enhances existing capabilities for SLA management and predictive analytics, enhancing operational efficiency and reliability.

This article dives deep into the functionalities and benefits of the Airflow Connector for AAI, insights from Broadcom on their support for Airflow, and what this means for the future of automation analytics.

Free Automic Automation v24 Training

Two new courses have been published on the Broadcom Academy to help you plan and prepare for your upgrade to v24.

Automic Automation Release Overview: V24 - V21.0.x
Course Code: 86AUW10025

This course is for anyone who works with Automic Automation: Administrators, developers, operators and the user community at-large.

Broadcom released a number of Service Packs for V21 and many of those features are precursors to the V24 release. Consequently, we are covering both. We will start with V24, since most users will want to prioritize this content and many will be comfortable with the Service Packs. However, we strongly recommend watching everything as many Service Pack features serve as building blocks to the new release.

Automic Automation: Upgrading to Version 24
Course Code: 86AUW10024

This course helps Automic Automation administrators plan, prepare and execute the upgrade of their systems. It also describes the necessary steps to manually upgrade all Automic Automation components from V21 to V24.

Trending Challenges in Observability for Workload Automation

Join this webinar with Dimensional Research analyst David Gehringer, who shares results from his recent survey of 500+ executives and practitioners that identifies the challenges that organizations are facing in workload automation observability in today's complex hybrid cloud environments.

Jennifer Chisik, Head of Product for Automation Analytics & Intelligence(AAI), will join him to share details on the latest release of AAI, including the new integration that tackles the Airflow sprawl.

Automic Automation V24 Released

We are thrilled to announce the release of Automic Automation V24. In today's interconnected world where diverse workforces and global operations are the norm, Automic Automation V24 is set to transform how businesses operate on a global scale.

The major themes of this release include:

- Global Collaboration through Unicode/UTF-8 Support
- Enhanced Accessibility for All Users
- Empower Development with the Automic REST API
- Unified OS Agents for a Consistent Experience

This release underscores Broadcom's commitment to providing a robust and reliable platform that meets the needs of its diverse user base.

Watch our webcast, "What's New in Automic Automation V24," hosted by Kaj Wierda, Product Manager for Automic, Broadcom, to learn how Automic Automation V24 is paving the way for a more connected and inclusive global business environment.

Announcing AWS Batch Integrations

The AWS Batch Extension simplifies the coordination of AWS Batch workloads within your current enterprise workload automation system.

Serving as a centralized "manager-of-managers," it enables you to schedule AWS Batch workloads effortlessly while tapping into the advanced capabilities of your enterprise solution. This includes managing dependencies, corporate calendar integration, event-based scheduling, and SLA management—simplifying operations and improving service delivery.

AWS Integrations for Automic, AutoSys, and dSeries

While organizations are seeking efficiencies by using built-in workload automation from AWS, cloud-native tools create islands of automation leaving IT Ops blind to dependencies between jobs and the impact that delays have on SLAs. AWS integrations for Automic Automation, AutoSys, and dSeries provide the ability to leverage advanced scheduling for AWS workloads as well as provide end-to-end visibility for the workload regardless of whether it is on premises or in the cloud.

Read on to see how what Automic Automation, AutoSys, and dSeries offer for AWS solutions.
