

NetOps Newsletter

- January 2024 -

Hello from the NetOps team at Broadcom! Read on to find the latest info and resources to help you gain the most value from your NetOps solutions including DX NetOps and AppNeta.

SMALL BYTES

Real problems. Real use cases. Real solutions... Real quick!

New Year, New Small Bytes: Real Problems, Real Solutions, Real Quick!

In this short webcast series, we cover solutions to understanding network experience from the end-user perspective, on any device, on any network, anywhere in the world. View previous sessions and check out upcoming topics!

Upcoming sessions:

- **Gain Rapid and Accurate Isolation of Modern Network Performance** – Wednesday, January 31st @ 12pm ET
- **FIS Extended Visibility Beyond Network Edge & Improved Triage** – Wednesday, February 7th @ 12pm ET
- **Correlate SD-WAN for Root Cause of Performance Issues** – Wednesday, February 21st @ 12pm ET
- **Ensure Optimal Network Experiences for Your Remote Insurance Agents** – Wednesday, February 28th @ 12pm ET
- **Monitor SD-WAN Performance-Based Routing Policies To Validate SLAs** – Wednesday, March 13th @ 12pm ET
- **ResultsCX Decreases Network Performance Triage Time by 90%** – Wednesday, March 20th @ 12pm ET
- **Automatically Fix Non-Compliant Network Devices Before an Outage** – Wednesday, March 27th @ 12pm ET

NetSecOps: Examining How Network and Security Teams Collaborate for a Better Digital Future

As the network becomes more complex and the attack surface grows, network and security teams need to work together more closely than ever and they need to have access to high-quality network data. In this report, EMA advises network teams to create reliable sources of truth for network data to ensure that they have a consistent and accurate view of the world that can benefit their collaboration with the security team.

Forbes Tech Council: Monitoring Cloud To Data Center

With business demands shifting to cloud-based resources and distributed workplaces, the data center is out as the central hub for enterprise IT, replaced by the Internet. But, evolving technology can instigate challenges. Network visibility gaps. Performance uncertainty. Management complexity. Compliance violations. Broadcom VP and GM of Agile Operations Division Serge Lucio shares what network teams need to avoid putting their businesses at risk.

2024 Predictions: NOC Shifts and Converges with SOC and AI Network Assurance

The network is always changing. In the recent past we've seen the rise of cloud and SD-WAN and the movement of networks that network operations teams are responsible for out of the datacenter. With AI workloads increasing and the security threat landscaping evolving, what we call 'the network' continues to evolve. In his post on [VMBlog](#), Broadcom's Director of Network Management Software, Michael Melillo, explores what is in store for 2024.

Gain Cloud Network Visibility: End-to-End From User to Cloud

As more apps and services are moved to the cloud, network operations teams can lose visibility yet are still responsible for solving issues when they occur. There is no need to suffer from cloud blind spots. Watch this short video to learn how network operations teams can regain visibility both to and through the cloud, including multi-cloud architectures.

Experience is the New Benchmark for Network Operations

February 8th, 2024 - Ecole Alain Ducasse, Paris Studio

Experience is the New Benchmark for Network Operations Event

Register and Savor the Future: Uniting Network Mastery with Culinary Delights
9:00 a.m - February 8th, 2024

Tailored specifically for our customers from France and Belgium and with the participation of our partners Simac and Tricise, this event is looking to mix the networks and culinary expertise.

We expect to have an interesting dialog with our most influential, forward-thinking leaders in the network management space combined with the culinary expertise from the traditional Ecole Alain Ducasse in Paris. The Agenda will cover familiar topics and outcomes that are expected for many enterprises to succeed in a hyperconnected world, such as the importance of optimizing network operations, accelerating its transformation and enhancing connected experiences.

What's New with AppNeta

Monitoring Policies - General Availability Monitoring policies streamline the setup and maintenance of monitoring, especially for customers with large-scale and dynamic sets of Monitoring Points, significantly reducing the time and effort involved. If your responsibility includes configuration, please watch this [15 minute video introducing the topic](#) and explaining the transition. [SaaS.17.1]

Release Note Highlights:

AppNeta On-Prem 16.22 winter release The latest release for AppNeta On-Prem includes rootless container-based Monitoring Points, support for the cpe40 Monitoring Point on Arista switches, accessibility enhancements in the AppNeta On-Prem UI, an increase to the number of Monitoring Points removed daily by a Monitoring Point deletion policy, and more! Check out the release notes for more detail and stay tuned to hear from Broadcom Support about scheduling a maintenance window. [EMP 14.0.9, EMP 14.2.0, On-Prem 16.22.1]

Dashboard auto-refresh The Network Violations Summary, Web App Violations Summary and Application Quality Dashboards now have a setting that enables their data to refresh automatically. This enhancement ensures that dashboards displayed in network operations centers consistently remain up-to-date. [SaaS 17.1]
