

## NetOps Newsletter

- February 2024 -

Hello from the NetOps team at Broadcom! Read on to find the latest info and resources to help you gain the most value from your NetOps solutions including DX NetOps and AppNeta.

### 5 Steps to Troubleshoot Issues in Modern Networks

Networks are becoming more elastic, flexible and agile than ever before. By modernizing and virtualizing their networks, teams are able to increase capacity and improve security. But, complexity can increase, making troubleshooting difficult. Discover how you can apply 5 easy steps to troubleshoot problems even in the most complex, modern networks.

### Addressing the Visibility Gaps Posed by Wi-Fi Networks

In recent years, Wi-Fi has emerged as the de facto architecture for local area networks (LANs) and campus networks. Wi-Fi is also gaining more widespread usage in factories and operational technology environments. Despite its ubiquity, Wi-Fi presents some persistent challenges for network operations center (NOC) teams. This blog explores how you can close visibility gaps and address related challenges.

### What's New with AppNeta

#### AppNeta's Design Enhancements for Seamless NetOps Experience

We are enhancing the look and feel of AppNeta's user interface to improve clarity, style consistency, and accessibility to better align with DX NetOps. The visual design will concentrate on aesthetic elements such as background colors, fonts, and icons, without affecting functionality, navigation, or workflows. The updated design is scheduled for release in April 2024.

#### Release Note Highlights:

**Monitoring Point tags** You can now apply tags to Monitoring Points. Monitoring Point tags provide additional context to monitoring data, allowing users to quickly categorize, search, filter, sort, and visualize monitoring results. They can also be used in Monitoring Point rules to select which Monitoring Points to include in a monitoring policy. [SaaS 17.3]

**Disable and enable monitoring policy network paths** You can now enable and disable individual network paths within a monitoring policy from the AppNeta user interface. [SaaS 17.2]

**Filter and sort monitoring policies and groups** You can now find specific monitoring policies and monitoring policy groups on the Monitoring Policies page with the filter bar and sort field. [SaaS 17.2]
