PRODUCT ANNOUNCEMENTS

DX Application Performance Management

Version: 23.2

Read the Full General Availability Release Announcement [here](#).

On July 18, 2023, the DX APM/AXA team announced availability of the latest Application Performance Management. This release includes enhancements that extend product capabilities and usability.

Highlights include:

- Embedded dashboards so select dashboards appear as tabs if you select any metric that matches the condition.
- Enhanced search and favorites in Metric Browser which allows users to filter and display only objects marked as favorites.
- Move to HELM Charts for Kubernetes installation technology.

You can find the Release Notes [here](#).

DX Operational Intelligence

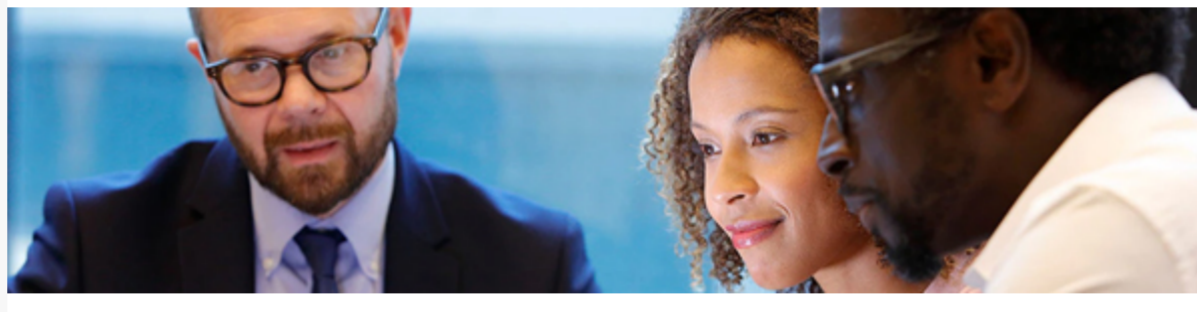

Version: 23.2

Read the full General Availability Release Announcement [here](#).

Also on July 18, 2023, the DX Operational Intelligence team released the latest version of this AIOps and Observability solution. Enhancements span these major functional areas:

- Alarm Analytics
- Service Analytics
- Dashboards and Reports
- Monitored Inventory

We encourage you to read details of the numerous enhancements and highlighted benefits in the Release Announcement [here](#). You can find the Release Notes for DX Operational Intelligence 23.2 [here](#).

Top Reasons to Embrace a Hybrid Multi-Cloud Strategy

It is not always possible for IT to rely solely on cloud resources; on-prem resources might be required for privacy reasons. With many options, it is useful to agree on definitions and when you might choose one or more approaches. This blog addresses the architectures for private, public, hybrid, multi-cloud and hybrid multi cloud architectures and when they might choose one or more approaches.
