EVENTS AND WEBINARS

StarEast

Did you miss us at StarEast? Watch the presentation hosted jointly by Martin Salgado from Broadcom as well as customers from CVS and Barclays around balancing the need for quality while improving lead time for change. For those unfamiliar with StarEast, it is an annual conference for software testing and quality assurance professionals. This year's event was held on May 3rd and 4th in Orlando Florida.

Using Service Virtualization with the Mainframe

April 27, 2023

This webinar, delivered by Karl Miller, Global Technical Services Consultant, describes how Service Virtualization can be used with the Mainframe. Service Virtualization removes constraints by simulating mainframe systems that are expensive, unavailable or being modified. SV can either virtualize the mainframe as accessed by distributed systems via HTTP(S), IBM Websphere MQ, IMS Connect Gateway or CICS Transaction Gateway. Be sure to watch the recording.

PRODUCT ANNOUNCEMENTS

Service Virtualization

Are you using the latest version of Service Virtualization (10.7.2)? Are you interested in accessing the features that will be in the next version of Service Virtualization without the hassle of upgrading? Customers on Service Virtualization 10.7.2, can request early adopter patches to get access to new capabilities early. Learn more about early access capabilities by checking out our [Post 10.7 Updates](#) Documentation.

Agile Requirements Designer 3.3, March 2023

There is a new plugin framework available in the new release of Agile Requirements Designer (ARD), version 3.3. Customizable plugins help the development team integrate with any tool from test case management systems to mainframes. ARD 3.3 also improves the way customers integrate automation script generation into their CI/CD pipeline, enables flow search in ARD Hub, and improves the experience of manual path building, among other new capabilities.

CDD SaaS May Release

Updates to the SecOps Items Report

The Grafana SecOps dashboard presents the vulnerabilities trends - How many items were detected or remediated over time.

The Security Items Report in CDD was enhanced to list the items that were added or removed in a specific time frame, such that the security stakeholders can now deep dive into the historical data to understand what are the items that cause a peak in the count, or what items removed which case the numbers to drop.

New and Changed Plugins:

- New plugin Cucumber JVM 11 plugin developed to support Java 11 tests projects
- New Plugin was developed to support Jira Cloud (in addition to the current plugin which interface with Jira on-prem)
- The Ansible Tower plugin was enhanced to support transitions from "Ansible Tower" to "Ansible Automation"
- The REST plugin was enhanced to authenticate with OAuth 2.0 Client Credentials

“How to Revitalize Your Testing with Continuous Everything Practice“,

Blog by Shamim Ahmed, CTO at Broadcom

Software testing has been an established discipline as old as software development itself. We have seen significant evolution of testing practices recently specially driven by Continuous Delivery and DevOps, where testing is increasingly integrated with agile development and other software lifecycle practices.
