PRODUCT ANNOUNCEMENTS

General Availability DX APM – SaaS 23.12.1 and DX APM Agents 23.12.1

On December 10, 2023, the DX APM/AXA team announced availability of DX APM 23.12.1. This release includes enhancements for thread dump in Metric Browser; limiting script execution time in javascript calculators; sub properties for app onboarding; creating variables in dashboard embedding configuration; cloud proxy supportability metrics and new user interface styling. For details, read What's New [here](#).

Additionally, read the Release Notes for DX APM Agents 23.12.1 [here](#). Specifically, enhancements cover the Infrastructure Agent, Java Agent, .Net Agent and UMA.

General Availability DX Operational Intelligence – SaaS 23.12.1

On December 21, 2023, the DX Operational Intelligence team released the latest version of this AIOps and Observability solution. The areas of enhancements include manually triggering policies, Maintenance Windows, displaying All Alarms Summary and DX Dashboards. Read the Release Notes [here](#).

BLOGS & ASSETS

Blog: Explore Benefits and Use Cases for Discovery Server to Optimize Infrastructure Observability with DX UIM

Discovery Server probe and its related components collect, process and store information about devices and apps to provide a unified, full stack observability view of monitored inventory and enable users to easily create groups, filters and policies based on device attributes. Leverage this for your hosted environments and customers. Read [here](#).

Blog: Installation and Upgrade Enhancements Delivered in DX Platform 23.3

Read this post by [Sergey Matusevich](#), software engineer for DX Operational Intelligence who is focused on the DX Platform Installer. Sergey describes several new capabilities of the DX Platform Installer, their benefits and best practices for on-premises deployments of the DX Platform. Read [here](#).

Blog: DX UIM 23.4 Sets a New Standard for Infrastructure Observability

In this blog, [Ashish Aggarwal](#) describes how DX UIM 23.4 sets a new standard for full stack infrastructure observability with the new Observability Viewer, in-product content enrichment and non-root user access option as well as updates to zero-touch monitoring with MCS, user personalization, platform and database support, and unified hybrid multi-cloud monitoring. Read [here](#).

Broadcom Designated Weekend Upgrade Program for DX UIM 23.4 – Feb. 10-11, 2024

Version currency is critical to protecting your investment. Support programs such as Pre-Event Review Planning and Designated Weekend Upgrades help guide you through the upgrade and reduce risk of upgrade failure. The Designated Weekend Upgrade program for DX UIM 23.4 will occur February 10-11, 2024. [Register now](#).

DX UIM Customer References Highlight Treasured Features and Benefits of Full Stack Infrastructure Observability

Learn how scalability for IT complexity, hybrid infrastructure management, intelligent operations and more drive customer loyalty for DX UIM. These published customer references highlight most-favored features and benefits with customers, including Broadcom itself, and a large MSP. Leverage these with your internal stakeholders.
