### EVENTS & WEBINARS

#### Creating On-demand Service Virtualization Environments, March 14th

Join Karl Miller and Uttam Anand, Global Strategy Consultants for Broadcom, as they share how Service Virtualization is able to create production-like on-demand environments to help organizations accelerate and improve product delivery.

During this session you will learn:

1. Best practices on automating spinning up and down virtual service environments.
2. How to spin up an on-demand environment with the relevant services to test.
3. How to automate custom configurations to meet team needs.

#### Test Data Manager, 4.11, March 28th

Test Data Manager(TDM) is one of the pillars for the DevOps portfolio by Broadcom. TDM provides the capability to create, manage, and deliver test data to development and testing teams in a structured and repeatable way for efficient, cost-effective test cycles needed to deliver applications faster. The new release, TDM 4.11, includes new features like unified PII scan, mask and audit, scalable masking, NoSQL support, and much more. Join this webinar led by Abhijit Mugali, Product Manager for Test Data Manager to learn all new functionality delivered as part of the release.

#### Office Hours

We are excited to expand the availability of our DevOps office hours, which will be hosted at 3:30 p.m., Australian Eastern Daylight Time on the following dates:

Wednesday, March 27, 2024

Wednesday, June 26, 2024

Wednesday, September 25, 2024

[Register Now 3:30pm AEDT](#)

We will also continue to hold DevOps Office Hours monthly on the second Wednesday of each month at 9:30 am Eastern Standard Time.

[Register Now 9:30am EST](#)

We will present topics during each meeting and invite you to join to learn more across all the DevOps products. Experts from all of the product teams will be attending to answer any questions you may have. It is a great opportunity to have open dialogue with the product teams and interact with your peers from other organizations.

If you aren't able to attend office hours, [recordings](#) are available.

### Product Announcements
