

PRODUCT ANNOUNCEMENTS

Introducing New Secure Web Gateway (SWG) Hardware

Symantec is announcing a new addition to the Secure Web Gateway hardware appliance line-up—the SSP-S210-10. This new appliance provides another powerful option to deploy Symantec SWG solutions throughout your organization, especially in remote or branch offices. We sat down with the Product Management Team for Symantec Secure Web Gateway to learn more.

Symantec Web Protection Suite: A Single Gateway for Web and Cloud Applications

Whether in the office, at home, or on the go, modern workers need access to web content and cloud applications to maintain high levels of productivity. If you can't provide fast, secure access to that information, some "resourceful" employees will find other means to get it --behavior that poses a direct threat to their enterprise networks.

Symantec Localization Zones: A Great User Experience Transcends Borders

Job number one of a great network is to provide a good user experience in terms of performance. However, speed doesn't matter if you end up at the wrong destination, at least in terms of how the end user sees the web.

SERVICE ANNOUNCEMENTS

End of Life Announcement

In conjunction with the recent launch of the SSP-S210 new hardware appliance, an End of Sale (EOS) and End of Life (EOL) notification will be issued for the current [Advanced Secure Gateway appliances](#) and the [Content Analysis S200 appliance](#) (EOS is April 30, 2022).

Action Required - Your ABRCA Root Certificate

Recently you should have received your seventh reminder that the root certificate for one or more of your Symantec products will be expiring. Below you will find a copy of this communication, which includes instructions as to how to update each affected product's certificate. You are advised to take action as soon as possible to avoid any system failures when the certificate(s) expire.
